

AURATM
PERFORMANCE HEATERS

AURA CF SERIES RADIANT HEATER

Aura CF Series infrared Heaters are powered by an advanced carbon fiber emitter technology that generates instant, directional warmth, while limiting the visible light and glare.

The Aura CF Series heater are constructed in both Stainless steel and epoxy powder coated aircraft grade aluminum. The heaters are cETLus approved and are IP65 rated for water and dust resistance that can operate in virtually all-weather conditions.

The Aura CF Series have built in wireless controls that allow users to turn heaters on and off as well as adjust the output level.

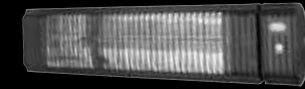

Aura | CF Series Specifications

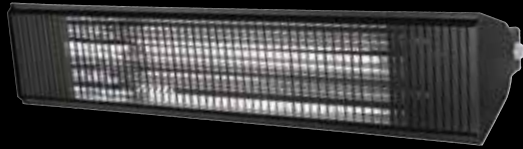

CF40240SS/60240SS – Stainless Steel
up to 6000W

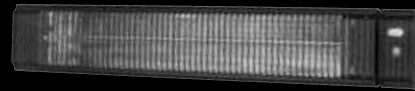

CF30240SS – Stainless Steel
up to 3000W

CF15120B – Black
up to 1500W

CF40240B/60240B – Black
up to 6000W

CF30240B – Black
up to 3000W
